Introducing Pending Paypal

The default Magento configuration doesn't show the orders with pending payment into the customer's orders list.

This module activates the orders with pending payment into the customer's orders list and allows the customer to proceed with the payment.

The customer can to pay an old order placed with paypal payment method with simple click on link in the payment section of order.

When payment has been received the system changes the status of the order, assigning one set in the configuration panel, creates the invoice and redirects the client on the page of e-commerce set in the configuration panel.

The module provides a small configuration panel where you can:

- Enable / Disable the module
- Set the order status after payment is received
- Set the landing page to the user's payment. The page can be selected from the list of pages in the CMS.

Setup

The installation of the module is very simple:

1. Go to your Magento Admin Panel and **disable cache**
2. **Unzip** the package on your computer
3. Log in to the magento website via **ftp**
4. Upload the folder "**app**" and "**skin**" in the root of your magento site.

If you use a different from default theme - be sure to rename app/design/frontend/default/default folders to your store's values.

Check if module work:

1. Go to your Magento Admin Panel
2. Go to System → Configuration → IMSEO → Pending Paypal Payment → Configuration

If the module doesn't work refresh the cache

Configuration

The screenshot shows a configuration interface for the 'Pending Paypal Payment' module. On the left is a sidebar with a 'Configuration' section containing a tree view with items like 'IMSEO', 'Pending Paypal Payment', 'Cookie Profiling Law IT/EU', 'Selling Tickets with Seats', and a 'GENERAL' section with sub-items 'General', 'Web', 'Design', and 'Currency Setup'. The main area is titled 'Pending Paypal Payment' and has a 'Save Config' button in the top right. It contains two sections: 'Settings' and 'Copyright'. The 'Settings' section has three rows: 'Enable?' set to 'Yes', 'Set order state' set to 'Processing', and 'Landing Page' set to 'Landing Page after Payment from PendingPaym'. Each row has a '[STORE VIEW]' link. The 'Copyright' section shows 'Developed by IMSEO Srl'.
